

STELLAR[®] Hooklift Spider - ISO Container Attachment

The Spider attachment allows a standard Stellar Hooklift to attach to 20-foot long ISO shipping containers without the need for additional understructure on the container. The Spider attachment kit does not interfere with the normal use of a Stellar Hooklift.

The Spider frame attaches to existing anchor points on the ISO container, and in a very short time period, the container is attached, loaded onto the hooklift and transported. In conjunction with certain Stellar Hooklifts, it can handle both empty and loaded containers with a gross weight capacity of up to 40,000 pounds. When the Spider attachment is removed from the hooklift, the hooklift can be used for other, more standard applications set-up for a hooklift, such as flatbeds and dump boxes. Spider kits are available for both 8-foot and 8.5-foot high 20-foot long ISO containers..
